DLB is far more apt to overstress and burden families. In facilitating a support group, my wife and I have found that getting people to share their experiences makes them realize the commonality of the bizarre symptoms they see in their loved ones and normalizes the experience so that they feel better able to try new coping skills at home

In the unchanging way, after embolic fit, a "reperfusion recipe" could be delivered intra-arterially to the ischemic and newly reperfused region using percutaneous catheters in the interventional neuroradiology number, with fussy management of reperfusion parameters.

Quarterly reports have been published by the Link director during the year giving an account of technical developments under the project in-country and a notable highlight has been the opening of the field laboratory on the Peradeniya campus.
